

GRL Engineers, Inc. is the new name of Goble Rausche Likins and Associates, leaders in Dynamic Testing and Analysis of Deep Foundations. The change reflects the retirement of founder and long time partner Dr. George Goble, and highlights the pride that GRL takes in its team of senior, experienced engineers. GRL will continue to provide the same high quality dynamic testing services it has been providing for 27 years, including determination of foundation bearing capacity, verification on foundation integrity and driving hammer evaluation.

Phone numbers, faxes, email addresses and office locations remain the same:
