GRL and PDI Retain Authorized Provider Status

The International Association for Continuing Education and Training (IACET) renewed GRL Engineers and Pile Dynamics' prestigious Authorized Provider status through 2010. Providers are the only organizations approved to offer IACET Continuing Education Units (CEUs). The Florida Board of Professional Engineers also renewed GRL Engineers' status as an Authorized Provider of Professional Development Hours in Florida through 2011.

"GRL and PDI are proud of our education programs which train more than 120 engineers each year in foundation testing and analysis skills so that they stay on the cutting edge," stated **Gina Beim, P.E.**, who manages the continuing education and training programs for the companies.

To retain this status, the companies completed a rigorous application process, including a review by an IACET site visitor, and successfully demonstrated adherence to the ANSI/IACET 1-2007 Standard addressing the design, development, administration, and evaluation of its programs. A similar process was necessary to retain the status of provider in Florida.

GRL has been providing deep foundation testing and analysis services for more than 35 years. Sister company PDI manufactures state-of-the-art systems for deep foundation testing and installation monitoring.
