Pile Dynamics, Inc.'s new brochure won a Print Image Excellence Award. PDI commissioned a brochure to introduce its SiteLink technology to U.S. State Departments of Transportation. Award-winning graphic designer Pam Spremulli created the brochure, which shows how an engineer in the office could use a Pile Driving Analyzer® model PAX to test bridge foundations without having to travel, saving time and money for DOTs. Porath PrintSource produced the piece, and entered it into the national competition where it won second place. For more information visit www.pile.com. (...)
