

Left to right: Mr. Mohamed Hussein and Dr. George Goble.

PDCA SHORT COURSES A BIG HIT!

Two PDCA short courses made their debut at the Winter Roundtable. Both courses were very popular and received high marks from attendees. Dr. George Goble's course, "Pile Design for Non-Engineers," taught the basic methodologies of pile design without all the math! Mohammed Hussein of GRL Engineers presented an overview course on "Wave Equations and Dynamic Pile Testing." (see photo).

The PDCA sends a big thank you to Mr. Hussein and Dr. Goble for their time and efforts in delivering these courses.
