

Geoengineer Website: An effort of one becomes an effort of thousands

I am sure you noted that the format and presentation of the newsletter has improved significantly hopefully making it more attractive. The format and the content of the website also is constantly improving and the reason is one: The Geoengineer website started from an effort of one person but has become really an effort of thousands. This is proven also by the amount of information presented in this newsletter. Within the last 2 months we received more than enough information to significantly enhance the content of the website and make it more useful. Many respected members of the geo-community have contributed to the content and you can see a list of them below.

(...)

Also, G. Beim, A. Chrzanowski, A. Farris, N. Konstantinidou contributed by informing us of interesting resources... (including) A large, very interesting collection of free papers on dynamic testing of deep foundations, available by the Pile Dynamics and GRL Engineers website .
