

Cross Hole Sonic Logging Codes, Specifications and Guidelines

USA:

American Society for Testing and Materials, ASTM [D6760-14 - Standard Test Method for Integrity Testing of Concrete Deep Foundations by Ultrasonic Crosshole Testing](#)

Deep Foundations Institute, Manual for Non Destructive Testing and Evaluation of Drilled Shafts, 2004

Federal Highway Administration, Manual for Drilled Shafts: Construction Procedures and Design Methods, Publication no. FHWA-IF-99-025, Michael O'Neill and Lymon Reese, 1999

Federal Lands Highway Division of Federal Highway Administration, FLH 521.830 Standard Method for Determining Pulse Velocity through Concrete in Drilled Shafts

UK:

The Institute of Civil Engineers, Specification for Piling and Embedded Retaining Walls, section 9, 1996

France:

AFNOR (Association Francaise de Normalisation) NF P94-160-1, Auscultation d'un élément de fondation, Partie 1: Méthode par transparence, October 2000

China :

Ministry of Construction, Technical Code for Testing of Building Foundation Piles, Chapter 10. Crosshole Sonic Logging Method, JGJ 106—2003, J256-2004

Engineering Quality Control Department of, Jiejiang Department of Transportation Technical Specification of Dynamic Pile Tests for Highway Engineering, Chapter 6. Ultrasonic Method, JTG/T F81-01-2004

Shanxi Institute of Construction Research and Design and Shanghai Tongji University, Technical Specification for Inspection of Concrete Defects by Ultrasonic Method, CECS 21:2000
