Pile Driving Hammer Performance Webinar

Date: December 9, 2020

Learning Objectives:

At the conclusion of the webinar attendees will be able to:

- Describe three different types of pile driving hammers and their operation
- List at least three different types of hammer performance monitoring methods
- Develop models for common hammer types in a wave equation analysis
- Assign hammer efficiency values to different hammer types based on the performance measurements

Who should attend:

Geotechnical, structural and construction engineers; contractors, hammer and/or pile manufacturers and/or distributors; pile researchers and students interested in an introduction to hammer performance measurements and the wave equation analysis approach.

Certificate of Completion:

This program corresponds to 2 Professional Development Hours. A Certificate of Completion documenting the number of hours of instruction (PDH) will be provided to those that take a short quiz at the end of the webinar. Check with your engineering board of registration for their continuing education requirements.

Lecturer: Brent Robinson, Ph.D., P.E.,

Brent is a Vice President and partner in Pile Dynamics and GRL Engineers. He oversees civil engineering, research and development activities, and provides training to users of PDI equipment. He has lectured and performed measurement and analysis for foundation projects around the world.
